

Managing Growth in the Canton of Fayence

If, like us, you deplore

- Runaway, **unplanned développement**
- **Destruction of the countryside** and the proliferation of unplanned business parks
- **Roads** which fail to take pedestrians, cyclists, or the landscape into account
- **An unbalanced economy** based largely on tourism
- The gradual disappearance of **local agriculture**
- The **deterioration of the quality of life** and of local identity
- Delay in creating a **cohesive intercommunal** decision-making process along the lines prescribed by central government

If, like us, you think our canton **can** plan the sustainable development of its economy in a coherent manner – while respecting its natural beauty, its identity, and its inhabitants and maintain a social and cultural equilibrium

Then please join our association:

“Construire Ensemble L’Intercommunalité”

(Building Intercommunality Together)

Who are we?

An independent, non-partisan and non-political association aiming to:

- Unite the communes in the canton of Fayence (Fayence, Montauroux, Callian, Seillans, Tourrettes, Tanneron, Mons and St Paul en Forêt) in a coherent effective force for decision-making.
- Make sure a development plan for the canton is desired, created and adhered to

An association aiming to make proposals and encourage dialogue between the Canton’s elected officials, its inhabitants and all the players in its day to day life

What do hope to achieve?

1. **Urban development:** a plan to harmonise the growth of the Canton’s central communes
2. **The landscape:** an overall charter for the protection of the landscapes and environment of the Pays de Fayence
3. **Housing:** private and public programmes adapted to local needs and respectful of the local environment.
4. **The economy:** a diversified economy promoting sustainable economic development in which agriculture has a role to play
5. **Public Services and Structures:** the setting up of a structured community of communes, the only means of obtaining a coherent development plan for our Canton
6. **Dialogue:** meaningful consultation between the Canton’s inhabitant’s and its elected officials

Together, let us harness the live forces of our Canton to ensure its successful development and the preservation of its unique identity
